Notes

Aircraft are classified as EASA aircraft or non-EASA aircraft and this requires the appropriate EASA or national licence be held in order for the holder to act as a member of the flight crew.

These figures represent the number of licences held by licence holders with a valid EASA medical certificate.

Where both an EASA and a national licence is held, these are counted separately. The figures therefore represent the number of valid licences and not the number of individual licence holders.

Holders of only a valid Medical Declaraion of Health are not included. This data is not held by the UK CAA.

Notes

Aircraft are classified as EASA aircraft or non-EASA aircraft and this requires the appropriate EASA or national licence be held in order for the holder to act as a member of the flight crew.

These figures represent the number of licences held by licence holders with a valid EASA medical certificate.

Where both an EASA and a national licence is held, these are counted separately. The figures therefore represent the number of valid licences and not the number of individual licence holders.

Holders of only a valid Medical Declaraion of Health are not included. This data is not held by the UK CAA.
