## ENQUIRIES

**Statistics** Enquiries concerning the information in *CAA Monthly Statistics* should be addressed, according to the subject, as follows:—

Airport and Air Passenger Statistics : Civil Aviation Authority  
Room 209  
Shell Mex House  
Strand  
London WC2R 0DP  
Tel. 01 836 1207 Ext. 408

Airline Statistics : Civil Aviation Authority  
Room 622  
Aviation House  
129 Kingsway  
London WC2B 6NN  
Tel. 01 405 6922 Ext. 244

**Distribution** Enquiries concerning orders and subscriptions should be addressed to:—

Civil Aviation Authority  
Printing and Publication Services  
Greville House  
37 Gratton Road  
Cheltenham  
Glos GL50 2BN

**Civil Aviation Statistics for earlier years** Statistics for the period from January 1968 to December 1972 have been, or are in the process of being, published in the Civil Aviation Series of the Department of Trade & Industry's *Business Monitors*.  
The series comprise:

CA. 1	<i>Airport activity</i>	(Monthly)
CA. 2	<i>Air passengers</i>	"
CA. 3	<i>Air freight &amp; mail</i>	"
CA. 4	<i>Airline operations</i>	"
CA. 5	<i>Airline operations</i>	(Quarterly)
CA. 6	<i>Domestic passenger traffic</i>	"
CA. 7	<i>Air passengers – international and cabotage</i>	"
CA. 8	<i>Airline financial statistics</i>	(Annual)

Annual versions of CA. 1 to CA. 7 are also published

*The Civil Aviation Authority has no objection to the reproduction of extracts of information contained in this document if the Authority is acknowledged as its source.*

## **Civil Aviation Authority**

# **CAA Monthly Statistics**

**OCTOBER 1973**

*CAA Monthly Statistics* is prepared by the Civil Aviation Authority with the co-operation of the United Kingdom airport and airline operators; some of this information is required by the Civil Aviation Act, 1971. Statistics for the Channel Islands airports are provided by the Commandant for Jersey Airport and the Office of the Lieutenant Governor for Guernsey and Alderney Airports. The assistance from all these authorities is gratefully acknowledged.

Some of the figures included in *CAA Monthly Statistics* are provisional only and may be revised in later issues. Figures contained in monthly and quarterly tables have not been seasonally adjusted, but figures are given, in the tables covering past years, for the most recent six months and the corresponding six months one year earlier.

*Chief Statistician  
Civil Aviation Authority  
Aviation House  
129 Kingsway  
LONDON WC2B 6NN*

**Symbols and Abbreviations** The following are used throughout:

- + = UK Customs airport
- .. = not available
- = nil or less than half the final digit shown
- n.e.i. = not elsewhere included
- a.t-km = available tonne-kilometres

A.T. Movements = Air Transport Movements

**Rounding of figures** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

**Units of measurement** Metric measurements are used throughout *CAA Monthly Statistics*.

- Tonne = 1000 kilograms
- Tonne-kilometres = The product obtained by multiplying the number of tonnes carried by the distance flown measured in kilometres

Conversion factors (foot/pound system to metric system)

- 1 short ton (2000 lbs) = 0.9072 tonnes
- 1 ton (2240 lbs) = 1.0160 tonnes
- 1 statute mile (5280 feet) = 1.6093 kilometres
- 1 short ton-mile = 1.4600 tonne-kilometres

The explanations of other terms used throughout the Tables are contained in the section on Definitions immediately following the Tables.

# Civil Aviation Statistics—July 1973

## Activity at UK Airports

July 1973 saw a continuing expansion of activity in aircraft movements, air passengers and air cargo at UK airports. During the month there were nearly 76 000 air transport movements, 7000 more than in June and indicating 6.5 per cent growth since July 1972. For the three months period May to July 1973, the monthly average number of movements was just over 70 000 and this indicates 7.5 per cent growth since last year. Movements in the London area during the May to July 1973 period were at a monthly average of over 37 000, which is only 4.1 per cent higher than last year. The increase was mainly at Heathrow (+ 1548 movements, 6.6 per cent growth) but Southend also had considerable growth (+ 229 movements, 16.7 per cent growth). The other London area airports had decreases over the same period. Airports elsewhere in the UK had over 35 000 movements during July and had a monthly average of nearly 33 000 movements during the three months, May to July. This monthly average was 11.8 per cent higher than last year and much higher than the national or London area airports' averages. Glasgow (17.9 per cent) and Birmingham (14.5 per cent) were among a number of airports with substantially increased movements.

The 7.5 per cent increase in air transport movements, for May to July 1973 compared with the same period last year, comprises 7.2 per cent increase from scheduled services and 8.9 per cent increase from charter flights. UK operators increased their shares of this traffic by 0.3 percentage points to 83.8 per cent of charter flights movements and by 1.5 percentage points to 75.2 per cent of scheduled services movements.

The total number of terminal and transit passengers using UK airports in July 1973 exceeded 5 millions and this is the first time this figure has been reached. There were just under 5 million terminal passengers in the month and this indicates a growth of 9.3 per cent since last year. Over the three months May to July the monthly average was 4.3 millions and this indicates a growth of 8.9 per cent since the same period last year. The London area airports' terminal passengers growth in that period was 8.6 per cent. The corresponding figure for Heathrow was 10.3 per cent and there were increases at the other London airports apart from Stansted which declined by 49.8 per cent. Outside the London area there was a 9.5 per cent growth in terminal passengers for the three months period, again a higher growth rate than the national or London area rates. The larger airports outside London had varying amounts of growth with Glasgow (13.9 per cent), Manchester (9.2 per cent) and Birmingham (19.7 per cent) making most growth.

The 8.9 per cent growth in the total number of terminal passengers for the period May to July comprises an 8.3 per cent increase in passengers using scheduled services and a 10.2 per cent increase on charter flights. UK operators carried a marginally larger share (68 per cent) of those passengers using scheduled services, but a slightly smaller share (81.7 per cent) of passengers on charter flights.

During May to July nearly 13 million passengers used UK airports: 9.3 millions arrived or departed on inter-

national services and 3.6 millions on domestic services. Of the international passengers 5.6 millions used scheduled services, 8.6 per cent more than in 1972, and 3.7 millions used charter flights, 10 per cent more than in 1972. The most heavily used scheduled services continue to be those to the USA which carried 15.4 per cent of all passengers on international scheduled services. The next most used routes were to France with 13.9 per cent of these passengers. Growth since last year on scheduled services to the USA and to France was 2.9 and 7.7 per cent respectively. Spain continued to be by far the most popular destination for passengers in international charter flights with 41.2 per cent of the passengers, 9.7 per cent more than last year. The next most popular destination was Italy which attracted 11.5 per cent of the traffic and had 6.9 per cent growth.

The monthly average of passengers flying on the UK domestic routes during May to July 1973 was 1.2 millions, 8 per cent higher than the corresponding monthly average for 1972. The routes into and out of London had a 7.6 per cent increase in passengers and were dominated by the London/Scotland services which had a 14.2 per cent increase. The routes to the Channel Islands were the next most busy, but their growth, in aggregate, was small at 1.9 per cent. Services to Belfast continue to have growth above the national rate.

During July 1973 over 58 000 tonnes of cargo was picked up or set down at UK airports. This was a slightly greater amount than in the previous month but 8 per cent more than in July 1972. The monthly average for May to July 1973 was also 58 000 tonnes and this was 10.3 per cent higher than last year. London area airports considerably exceeded the national growth figures with 19.3 per cent for July and 12.2 per cent for the three months May to July. Heathrow's monthly average was 38 500 tonnes, 18.2 per cent more than in 1972 but each of the other London airports had a decrease. Outside the London area there was little growth overall: 1.5 per cent for July 1973 and 4 per cent for the three months May to July. However, the growth at Glasgow (52.2 per cent) and East Midlands (49.2 per cent) was outstanding as also was the substantial decrease at Belfast (20 per cent). Cargo carried in the May to July period by scheduled services was 13.7 per cent up on last year, but that carried on charter flights was 15.7 per cent down. More of the additional cargo was carried by foreign operators (11.7 per cent) than by UK operators (9.0 per cent).

## Output of UK Airlines

In July 1973 the output of UK airlines for scheduled and non-scheduled services was 871 million available tonne-kilometres which was 9.3 per cent greater than in July 1972. The scheduled services output was 541 million tonne-kilometres and was 14.5 per cent higher than last year; 1.8 million passengers and over 25 000 tonnes of cargo were carried and an overall load factor of 54.9 per cent was achieved compared with 52.2 per cent for July 1972. Seat-kilometres used amounted to 61.7 per cent of those available which was an improvement on last year's factor of 60.2 per cent: the seat factor on domestic services was 68.4 per cent and on international services was 61 per cent.

For non-scheduled services the output during July 1973 was 330 million tonne-kilometres and this was 1·6 per cent more than last year. Inclusive tour charters accounted for 156 million tonne-kilometres, 47·2 per cent of the July non-scheduled output. Advance booking charters accounted for 44 million tonne-kilometres, 13·4 per cent of the non-scheduled output; 60 750 passengers were carried under Class 2 licences and a seat factor of 84·9 per cent was achieved.

**NOTE:** Statistics of airport activity, passengers and cargo are derived from data supplied by airports. Airline statistics are based on data supplied by the airlines. Data from the two sources is not strictly comparable. There are small differences in timing and more significant differences arising because airlines are not asked to report non-revenue passengers and cargo.

## The 1972 Origin/Destination Survey at London's Airports

### II. The Air Passenger at Heathrow

Heathrow is by far the largest airport in the United Kingdom. In 1972 it catered for 46·8% of all UK terminal passengers, well ahead of Gatwick, which with 13·6% was in second place. It was also the busiest airport in the world in terms of international passengers, and the third busiest, behind O'Hare (Chicago) and J F Kennedy (New York), in total passenger throughput. In this article we examine some of the characteristics of the air passenger at Heathrow. The information is obtained from the Civil Aviation Authority's Origin and Destination Survey at London's airports in 1972. In particular we examine the differences between the passenger travelling on business and the leisure passenger, business passengers being defined to include armed forces on duty and airline staff on duty. The main categories of travel included under the leisure definition, which could more strictly be described as non-business, are holiday, visiting friends/relatives, migration and full-time studies.

Table 1 shows the business/leisure split for international and domestic terminating passengers.

**Table 1. Passenger Traffic Broken Down by Journey Purpose**

	Percent Business	Percent Leisure
International	33·0	67·0
Domestic	58·3	41·7
<b>TOTAL</b>	<b>36·3</b>	<b>63·7</b>

We see that only one third of international passengers are travelling on business journeys, whereas for domestic passengers the proportion is almost three-fifths. On some of the major routes there are striking differences in the division between business and leisure journeys. Table 2 looks at the six densest domestic routes, and at nine countries with high traffic flow to/from Heathrow. The differences between the domestic routes seem likely to be due primarily to the relative attractions of the areas they serve as holiday centres. In the case of Jersey and Belfast, a second factor serves to raise the proportion of leisure passengers, namely the comparative difficulty of travelling by surface transport, which lessens the diversion of the more cost conscious holiday travellers away from air transport. The same

characteristics are seen to be present on the international routes, shorter routes like Germany and Holland having a low proportion of leisure traffic compared with the much more distant North American destinations.

**Table 2. Business/Leisure Split on Major Routes**

Airport	Percent Business	Percent Leisure
Manchester	83·8	16·2
Newcastle	81·8	18·2
Glasgow	71·8	28·2
Edinburgh	60·7	39·3
Belfast	39·0	61·0
Jersey	19·1	80·9
Country		
Germany	58·5	41·5
Holland	49·8	50·2
Switzerland	42·8	57·2
France	38·0	62·0
Italy	35·1	64·9
Irish Republic	30·6	69·4
USA	19·9	80·1
Spain	17·2	82·8
Canada	14·5	85·5

#### Transport To/From Airport

Table 3 shows the mode of transport used to travel to and from the airport by the Heathrow passenger. We only consider the stage of the journey during which the passenger arrives at Heathrow or leaves Heathrow. Thus British Rail does not appear as there is no railway station at the airport, although the survey showed that it is used by 9·1% of passengers at some stage in their journey. Some caution should be exercised as regards the figures in Table 3. The passengers arriving by air were asked what means of transport they expected to use which, of course, may differ from what they actually used. Also, confusion can occur, particularly among arriving passengers unfamiliar with Heathrow, between the various types of bus. A private car was used by 48% of business passengers compared with 38% of leisure passengers. As might be expected the use of a chartered

bus was much higher among leisure passengers, at 10%, compared with 2% of business passengers. The difference between arriving passengers and departing passengers was most evident in the high use of taxis

by arrivals and the high use of buses by departures. In particular, buses run by the airlines were favoured by departing passengers possibly as a method of insuring that they did not miss the flight.

**Table 3. Mode of Transport To and From Heathrow – Business/Leisure Analysis**

Mode	Departing Passengers		Arriving Passengers		All Passengers	
	Percent Business	Percent Leisure	Percent Business	Percent Leisure	Percent Business	Percent Leisure
Private Car	45.1	36.0	51.5	40.1	48.0	37.9
Hired Car	6.3	5.3	4.3	4.9	5.4	5.1
Taxi	15.9	13.4	33.5	32.4	23.8	22.1
Chartered Bus	3.0	10.6	1.7	9.2	2.4	10.0
Airline and other public bus services	29.7	34.6	9.0	13.4	20.4	24.9
	100.0	100.0	100.0	100.0	100.0	100.0

Table 4 shows how the mode of transport varies with the origin or destination of the passenger. Over 50% of passengers with origin/destination outside SE England

use a private car. On the other hand, nearly a quarter of passengers with origin/destination in SE England use a taxi, and for arriving passengers, this rises to 35%.

**Table 4. Mode of Transport to and from Heathrow – South East and non-South East origins and destinations**

Mode	Departing Passengers		Arriving Passengers		All Passengers	
	Percent South East	Percent Non SE	Percent South East	Percent Non SE	Percent South East	Percent Non SE
Private Car	38.6	43.0	41.7	62.0	40.0	52.0
Hired Car	5.6	6.8	4.5	5.1	5.1	6.0
Taxi	15.2	7.5	35.1	17.2	24.2	12.1
Chartered Bus	8.3	4.6	7.0	2.7	7.7	3.7
Airline and other public bus services	32.4	38.1	11.7	12.9	23.1	26.2
	100.0	100.0	100.0	100.0	100.0	100.0

#### Persons Seeing Off/Meeting the Passenger

As might be expected business passengers have fewer friends, relatives or colleagues seeing them off or meeting them at the airport. Table 5 shows that the ratio was about one to four for business passengers compared with one to two for leisure passengers, and that less than one business passenger in five had anyone seeing him off or meeting him. This information is relevant to the design and planning of terminal buildings and spectator facilities.

**Table 5. Persons Seeing Off/Meeting**

No. of persons	Business Percent	Leisure Percent
0	82.4	70.8
1	13.0	16.2
2	2.6	7.8
3	1.1	2.2
4	0.5	1.3
5	0.1	0.7
6+	0.4	1.0
	100.0	100.0
Average No.	0.27	0.55

#### Income

Figure 1 shows the cumulative income distribution of passengers. For the business passenger it refers to gross income, that is before deductions are made. One half of business passengers earn less than £4500, and one quarter earn less than £3300. The top twenty-five per cent earned in excess of £7500. The income distribution of leisure passengers refers to the total income of all the members of the passenger's family who are living in his house. One half of the household incomes are less than £3800, and one quarter are below £2400. Twenty-five per cent were members of households with incomes above £6000.

It should be remembered that these incomes were earned at the time that the survey took place in late 1972.

NOTE: Following publication of the first article in this series enquiries have been received about the definition of origin/destination. In this Survey the origin/destination of an air passenger is defined to be the town or district in which he started/ended his journey to/from the airport. Where the journey is broken for a reason other than transit the journey is considered to re-start/finish at that point.

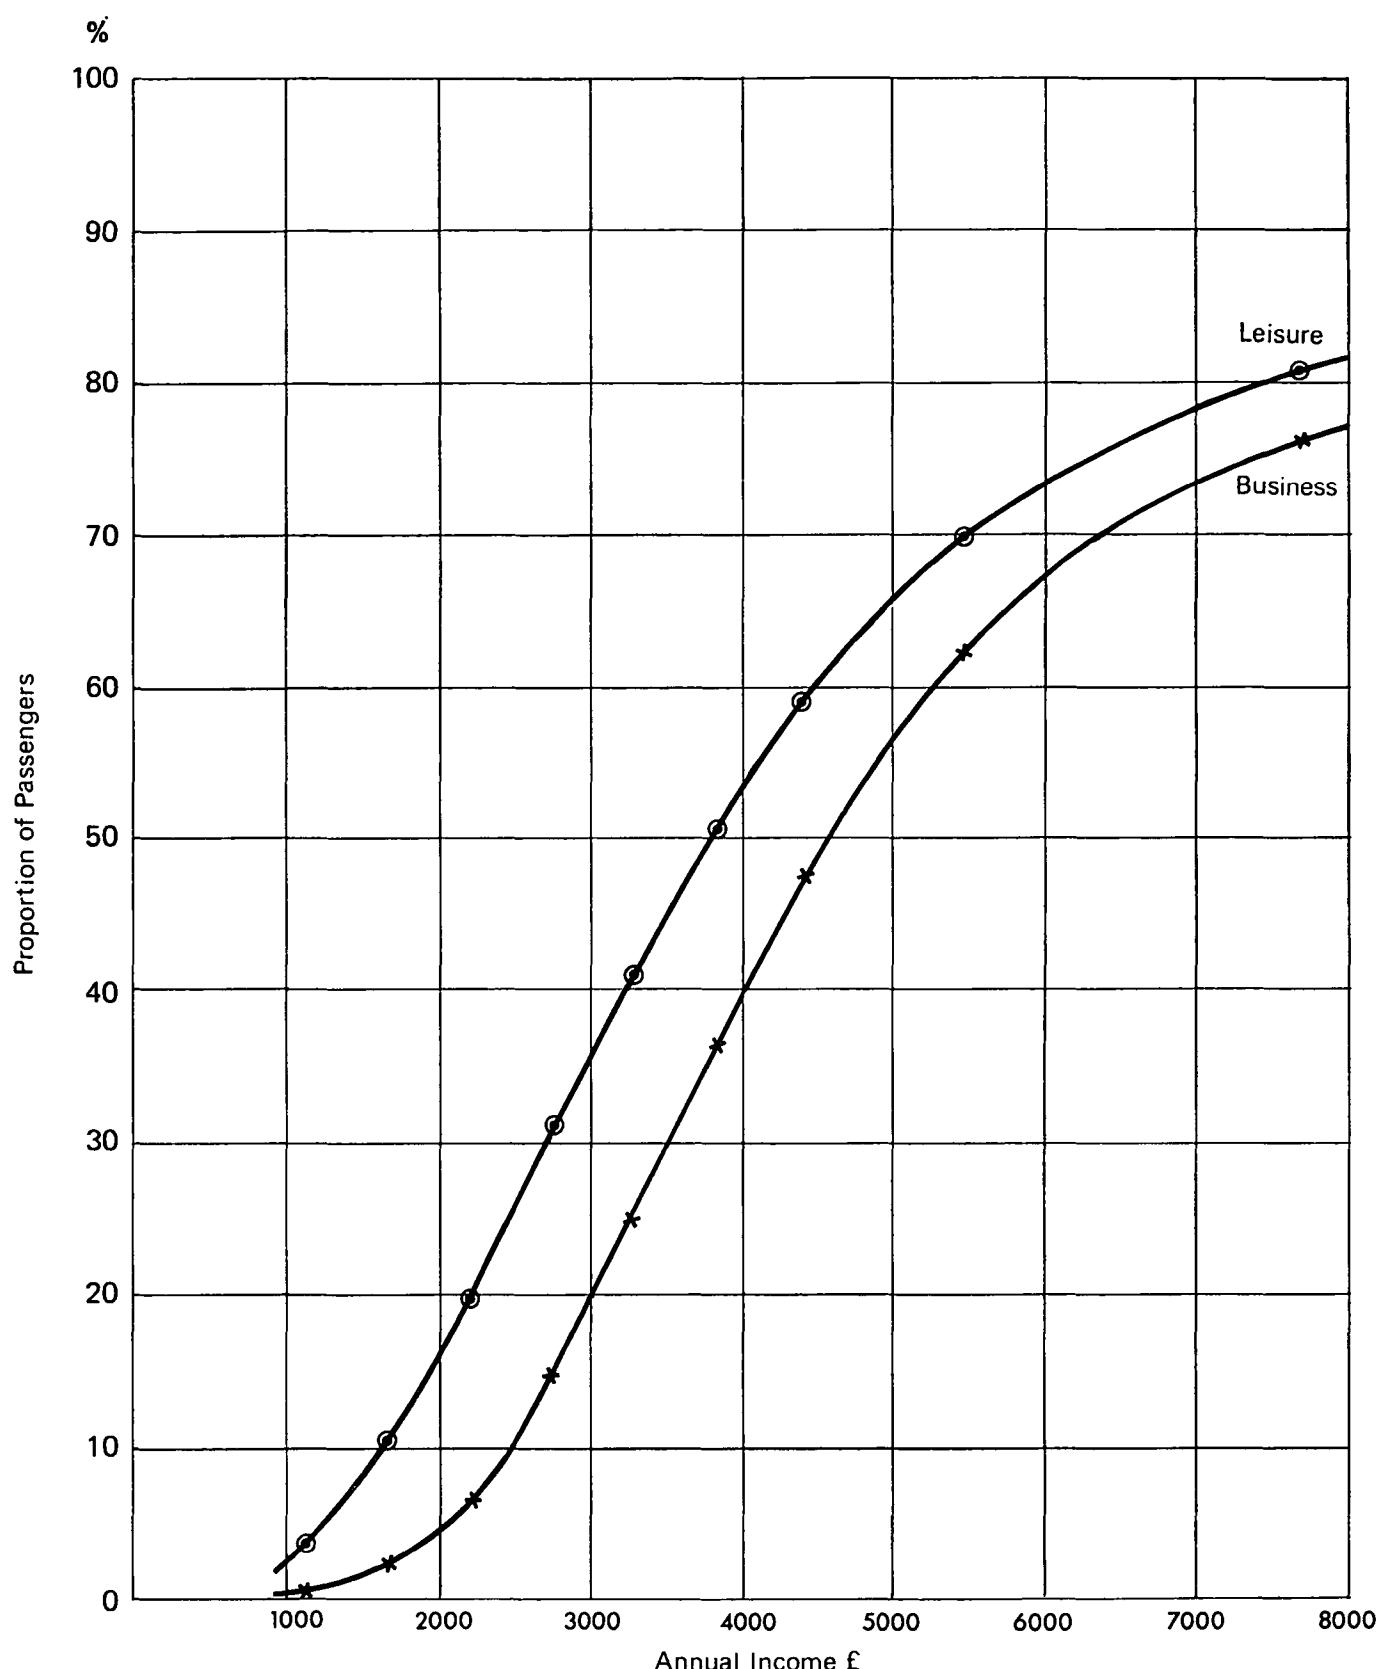

Fig 1. Cumulative Distribution of Passengers by Income  
 Business passengers – personal gross earnings  
 Leisure passengers – household gross income

**London** includes Heathrow, Gatwick and Stansted.

**S.E. England** includes Ashford, London, Luton, Lydd, Manston and Southend.

**N. England** comprises the airports in England north of a line from the Mersey to the Humber (Manchester, Liverpool, Blackpool, Newcastle, Leeds/Bradford and Tees-side).

**Glasgow** includes Prestwick and Abbotstown.

- (a) N. France comprises the airports north of the line of 49° latitude.
- (b) Soviet Union and Eastern Europe includes the United Soviet Socialist Republics, Bulgaria, Czechoslovakia, Hungary, Poland, Roumania and the Eastern Zone of Germany but excluding Berlin.
- (c) North Africa includes Algeria, Libya, Morocco and Tunisia.
- (d) Commonwealth countries only.
- (e) Commonwealth countries including Rhodesia.
- (f) Middle East includes Iraq, Iran, Israel, Jordan, Lebanon, Persian Gulf States, Saudi Arabia, Sudan and the United Arab Republic.
- (g) Total is in respect of charter passengers only. Passengers on scheduled flights included in London – Other Italy.
- (h) Total is in respect of charter passengers only. Passengers on scheduled flights included in other routes to Italy.

The figures show the uplift and discharge of passengers at United Kingdom airports on services operated there according to their immediate destination or last point of embarkation overseas on those services. These may not, in all cases, be the origin or destination of passenger journeys; they may be places at which a journey was broken or a connection made with another air service. The figures in this table include all passengers carried on scheduled and charter services excluding those carried on aircraft chartered by Government Departments.

## Domestic Passengers by Main Routes

	Total	21.5	14.1	52
Total		675.0	628.2	—

(a) Heathrow, Gatwick and Stansted  
Traffic counted in either direction

The figures show the uplift and discharge of passengers according to the destination and origin of the route. Because of the method of collection of this information there are discrepancies between the reports received from airports on a route, particularly in the case of multi-sector flights. In most cases, however, the discrepancies are small, but in a few cases the figures include an estimated component.

**Tables 24, 25 and 26 cover all operations performed under Classes B, C, D, E (types I and VI) and Class 2 licences. The division between 'inclusive tours' (Table 24) 'advance booking charters' (Table 25) and 'other separate fare charters' (Table 26) is based on the terms of the various licences. A service is an inclusive tour service where the tariff includes the cost of accommodation.**

# Definitions

## AIRPORT ACTIVITY

**An air transport movement** is a landing or a take-off of an aircraft engaged on commercial air transport. The types of movement covered are all scheduled service movements, whether loaded or empty, and charter movements transporting passengers or cargo from one point to another. All other types of commercial flying are excluded (e.g. flights returning to the airport of take-off without landing elsewhere, empty charter positioning flights paid for by the charterer, ferrying of empty aircraft, etc.).

**Empty charter positioning flights** are flights by chartered aircraft moving into position for transport flights or returning to base after such flights.

**Other commercial flights** are miscellaneous non-transport charter flights (e.g. commercial delivery or ferry of empty aircraft and local flights for the Press, survey companies or farmers).

**Test and training flights** are flights for the purpose of testing aircraft or airports, or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment. Aero-club instructional flights are excluded from this category and shown under 'Aero-club'.

**Other non-commercial flights** by air transport operators are flights by air transport operators for the sole purpose of moving their own aircraft, personnel or stores from one place to another, and air transport flights forced to return to base by bad weather, engine failure or other causes.

**Private flights** are flights for purely private purposes by private owners or other private aircraft operators, excluding aero-club flights.

**Aero-club flights** are flights operated by aero-club members for instruction or pleasure.

**Official flights** are flights for official purposes by British or foreign civil Government Departments excluding air transport movements.

**Military flights** are flights by British or foreign military personnel exclusively for military purposes.

## AIR PASSENGERS

**Passengers** includes all revenue and non-revenue passengers on air transport flights. Air crew being carried on such flights other than as members of the aircraft's complement are classified as non-revenue passengers.

**Revenue passengers** are those who pay 25 per cent or more of the normal applicable fare.

**A terminal passenger** is a passenger joining or leaving the aircraft flight at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport.

<b>A transit passenger</b>	is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transiting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.
<b>International services</b>	are services flown between the United Kingdom (including Great Britain, Isle of Man, Channel Islands and Northern Ireland) and places outside.
<b>Domestic services</b>	are services flown entirely within Great Britain, Isle of Man, Channel Islands and Northern Ireland.
<b>Cabotage</b>	is traffic carried between territories of the United Kingdom other than domestic services.
<b>Scheduled services</b>	are those performed according to a published timetable, including those supplementary thereto, and open to use by members of the public.
<b>Non-scheduled services</b>	include all air transport flights other than scheduled services.
<b>Charter services</b>	are those transporting passengers or cargo for hire or reward from one point to another, other than scheduled services.

## AIR CARGO

<b>Cargo</b>	means the weight of cargo (including accompanied vehicles) picked up and set down by aircraft on air transport flights. Cargo in transit through the airport on the same aircraft is excluded as is mail, company stores, excess baggage and diplomatic bags picked up and set down. (See also definition below when used in airline statistics where mail and excess baggage are included.)
<b>Tonnes</b>	are metric tonnes of 1000 kilogrammes (2 204·62 lb).

## AIRLINE OPERATIONS

<b>Aircraft-kilometre (Aircraft-km)</b>	an aircraft-kilometre is performed when an aircraft flies one kilometre. Aircraft-kilometres equal the sum of the products obtained by multiplying the number of flights performed on each stage flight by the distance measured in kilometres.
<b>Stage flights</b>	that part of the flight between two consecutive places, i.e. from take-off to the next landing, excluding technical stops, on the route.
<b>Aircraft-hour</b>	an aircraft hour is performed when an aircraft flies for one hour: aircraft hours are measured on the basis of block-to-block time.
<b>Average annual utilisation per aircraft</b>	is obtained by dividing the number of aircraft hours flown by the number of days the aircraft is in service and multiplying that quotient by the number of days per year (365).
<b>Passengers uplifted</b>	The number of passengers uplifted is obtained by counting each revenue passenger on a particular flight (with one flight number) once only and not repeatedly on each individual stage of flight, with the single exception that a passenger flying on both the international and domestic stages of the same flight would be counted as both a domestic and an international passenger.

<b>Seat-km available</b>	a seat-kilometre is available when a seat is flown one kilometre. Seat-km available is equal to the sum of the products obtained by multiplying the number of passenger seats available for sale on each stage flight by the distance measured in kilometres.
<b>Seat-km used</b>	a seat-kilometre is used when a seat occupied by a revenue passenger is flown for one kilometre. Seat-km used is equal to the sum of the products obtained by multiplying the number of revenue passengers carried on each stage flight by the distance measured in kilometres.
<b>Passenger load factor</b>	is an expression of seat-km used as a percentage of seat-km available.
<b>Tonne-km available</b>	a metric tonne of payload space available flown one kilometre. Tonne-km available is equal to the sum of the products obtained by multiplying the number of tonnes available for the carriage of revenue load (passengers and cargo) on each stage flight by the distance measured in kilometres.
<b>Tonne-km used</b>	a metric tonne of revenue load carried one kilometre. Tonne-km used is the sum of the products obtained by multiplying the number of tonnes of revenue load (passengers and cargo) carried on each stage flight by the distance measured in kilometres.
<b>Overall load factor</b>	is an expression of tonne-km used as a percentage of tonne-km available.
<b>Cargo</b>	means any property carried on an aircraft. In airline statistics it includes the weight of vehicles carried, excess baggage, mail and diplomatic bags (see also definition above for air cargo statistics where mail, excess baggage, company stores and diplomatic bags are excluded).
<b>Mail</b>	covers only that handled by postal administrations and includes troop mail.
<b>Separate Fare Charters</b>	are those where the charterer re-sells part of the capacity of the aircraft to the public at large; an organisation, etc.
<b>Advance Booking Charters</b>	Charter flights operated under Class 2 licences between the UK and designated territories overseas in respect of which an operator has sold blocks of seats to one or more licensed travel organisers for resale to passengers. Details of the sales to travel organisers have to be notified to the Civil Aviation Authority 120 days before the date of the flight; details of the sales of seats to passengers, which must be on a round trip basis, have to be notified to the Authority 90 days before departure. (Shorter periods of notification apply during the early months of the scheme i.e. from April, 1973.)
<b>Inclusive Tours</b>	are separate fare charters where the cost to the passenger includes the cost of accommodation.
<b>Single Entity Charters</b>	are those where the charterer has exclusive use of the whole capacity of the aircraft and does not dispose of any of it to third persons for reward.
<b>Sub-charters</b>	are charters to other British or foreign operators.
<b>Fifth Freedom Charters</b>	are those between foreign territories.
<b>Licence</b>	means an air transport licence granted under Section 22 of the Civil Aviation Act, 1971.

# Classes of Licence

- Class A** Means a licence for an air transport service (not being a charter service) between places named in the licence involving more than four flights in any one direction between the same two places.
- B** Means a licence for a charter service between places named in the licence (not being a group charter service) involving more than four flights in any one direction between the same two places.
- C** Means a licence for an air transport service between places named in the licence involving not more than four flights in any one direction between the same two places.
- D** Means a licence for a group charter service between places named in the licence, involving more than four flights in any one direction between the same two places.
- E** Means a licence other than a Class 2 licence for an air transport service which is not restricted to flights between places named in the licence. The types of Class E licence are:—
- Type I** Group Charter flights of the same nature as those licensed under Class D but for flights not restricted to places named in the licence.
  - Type II** Fifth Freedom Charters, i.e. flights between foreign territories.
  - Type III** Charters to other airlines (British).
  - Type IV** Charters to other airlines (Foreign).
  - Type V** Cargo charters for more than one consignor.
  - Type VI** Passenger charters for the carriage of more than one affinity group.
  - Type VII** Miscellaneous charter flights.
- Class 2** Means a licence which specifically authorises the carriage of passengers named on a list submitted to the Civil Aviation Authority in advance of the flight on condition that no seat occupied on the flight by a fare paying passenger has been sold to that passenger by or on behalf of the operator of the aircraft.
- Exempt Services** are services which do not require a licence by virtue of Section 21(2) of the Civil Aviation Act 1971, or an instrument made under that section, which may include single entity charters, charters to Government Departments, etc.
