1. Although operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, ie the aircraft's origin or ultimate destination. This has been the practice since 1 August 1976 - before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and chartered services excluding those carried on aircraft chartered by Government Departments.
2. These figures are based on the origin and destination of passengers as reported to UK airport authorities by UK and foreign airlines. Operators are required to report in respect of each service operated, the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey: the point at which a passenger disembarks from a particular service may not represent his ultimate destination.
3. For the purposes of this table, change of gauge passengers are treated as terminal and are included.
4. Excludes passengers at Carlisle, Dundee, Londonderry, Plymouth and Westland Heliport.

## NOTES

1. Traffic is only published for a point pair, if the annual total exceeds 9,500 (scheduled and charter together). Exceptionally in the case of London, all scheduled traffic is shown, regardless of amount (charter-only routes remaining subject to a minimum of 9,500 passengers per annum). In the case of the USA, all scheduled traffic is shown, regardless of the amount, to or from gateway points specified in the Bermuda II Agreement and subsequent amendments.
2. These figures are based on the origin and destination of passengers as reported to UK airport authorities by UK and foreign airlines. Operators are required to report in respect of each service operated, the point of uplift and discharge of each passenger. The figures may not reflect a passenger's entire air journey: the point at which a passenger disembarks from a particular service may not represent his ultimate destination.
3. Although operators are asked to report all passenger journeys, in some cases the actual point of uplift or discharge is not recorded. In such cases all passengers are allocated to the end point of the service, ie the aircraft's origin or ultimate destination. This has been the practice since 1 August 1976 - before this date missing information was replaced by estimates made by the Authority. The figures in this table include all passengers carried on scheduled and chartered services excluding those carried on aircraft chartered by Government Departments.
4. For the purposes of this table, change of gauge passengers are treated as terminal and are included.
5. Excludes passengers at Carlisle, Dundee, Londonderry, Plymouth and Westland Heliport.
6. In order to preserve market analysis all identifiable diversions are reallocated to the point of intended operation.

(a) Domestic traffic is counted both at the airport of arrival and the airport of departure.  
The total domestic plus international traffic is, therefore, only a measure of airport activity.  
(b) Where passenger/cargo aircraft breakdown is not available the tonnages are excluded.

## Appendix Definitions - UK Airport Statistics

There are some differences between the definitions used in this publication and those used in "UK Airlines - Monthly Operating and Traffic Statistics". These arise mainly because UK Airlines are not asked to report non-revenue passengers or non-revenue cargo.

### MOVEMENTS

**Aircraft movement** An aircraft take-off or landing at an airport. For airport traffic purposes one arrival and one departure are counted as two movements.

#### Commercial Movements

**Air transport movements** are landings or take-offs of aircraft engaged on the transport of passengers, cargo or mail on commercial terms. All scheduled movements, including those operated empty, loaded charter and air taxi movements are included. For the purpose of these statistics where flights are operated on a sub charter basis the operator is identified according to the flight number.

**Empty positioning movements** are movements by scheduled or chartered aircraft moving into position for transport flights or returning to base after such flights, including empty Air Taxi Movements.

**Local movements** are commercial flights undertaken for press, survey or agricultural flying, or public entertainment purposes.

#### Non-commercial Movements

**Test and training movements** are movements for the purpose of testing aircraft or for training flying crew or ground personnel. Also included in this category are demonstration flights by makers or sellers of aircraft and aviation equipment and Training School flights. Aero-club instructional flights are not included in this category.

**Other non-commercial movements** are non-revenue earning movements by air transport operators or manufacturers for the sole purpose of moving their own personnel or stores from one place to another, for delivery, refuelling or maintenance of empty aircraft, and air transport flights forced to return to base by bad weather, engine failure or other causes.

**Private movements** are movements for purely non-commercial purposes by private owners or other private aircraft operators, excluding aero-clubs movements. (See below)

**Aero-club movements** are movements operated by aero-club members for instruction or pleasure.

**Official movements** are movements for official purposes (excluding Air Transport Movements) by British or foreign civil Government Departments e.g. movements by aircraft of the Civil Aviation Authority Flying Unit and the Queen's Flight.

**Military movements** are movements exclusively for military purposes using military aircraft. Military movements at military airfields are not included in these statistics.

## PASSENGERS

- Passengers** All revenue and non-revenue passengers on air transport movement flights.
- A terminal passenger** Is a passenger joining or leaving an aircraft at the reporting airport. A passenger travelling between two reporting airports is counted twice, once at each airport. A passenger who changes from one aircraft to another, carrying the same flight number (change of gauge) is treated as a terminal passenger, as is an interlining passenger.
- A transit passenger** is a passenger who arrives at and departs from a reporting airport on the same aircraft which is transitting the airport. Each transit passenger is counted once only and not once on arrival and once on departure.

## CARGO

- Cargo** is the weight of property carried on an aircraft including for example, the weight of vehicles, excess baggage and diplomatic bags, but excluding mail and passengers' and crews' permitted baggage. Cargo in transit through the airport on the same aircraft is excluded.

## TYPES OF SERVICES

- International services** are services flown between the United Kingdom, Isle of Man, Channel Islands and places outside.
- Domestic services** are services flown entirely within the United Kingdom, Isle of Man and Channel Islands.
- Cabotage** here includes traffic carried between territories of the United Kingdom, Isle of Man and Channel Islands other than domestic services. (For the purposes of these statistics cabotage is shown under International Services.)
- Scheduled services** are those performed according to a published timetable, including those supplementary thereto, available for use by members of the public.
- Non-scheduled or charter services** include all air transport movements other than scheduled services.
