

CAA MMEL POLICY ITEMS (PI) - GUIDANCE INFORMATION

The CAA MMEL Policy Items have been drawn up to aid operators in the preparation of their MEL. Each policy item covers a separate subject and is numbered according to the ATA number of that subject. Each Policy Item will detail if it is applicable to Aeroplanes and/or Helicopters (A/H), and whether ANO and/or JAR-OPS (A/J) operational requirements are applicable. Additional references are detailed, as is guidance, on when the policy should be used.

The Policy Item Index lists all the subjects covered along with a summary of their applicability.

Wherever an MMEL has “As required by...” (Regulations / Operating Requirements / Air Navigation Legislation / FARs), and there is no applicable Policy Item, then the operator may use the entry from the JAA MEL Policy Document (JAA Administrative & Guidance Material, Section Four: Operations, Part Three: Temporary Guidance Leaflet 26) (TGL26) if available.
