[REDACTED]

I can say on behalf of RAF(U) Swanwick that the daily management L3M of EAMTA is operationally supported and a full safety assessment is near conclusion with tasks to be completed post ACP approval.

From an AMC/MABCC perspective I fully support the change to EAMTA airspace to bring it into line with current UK and European FUA policy and see this as a positive step forward which my team are content to support with additional workload.
