average daily departures 19  
 percentage of all departures 8%  
 daily range 0 - 86  
 days with no departures 54%  
 days with <10 departures 65%

— Noise Preferential Routes  
 — Radar track data below 3000 ft AMSL  
 — Radar track data 3000 - 6000 ft AMSL  
 — Radar track data above 6000 ft AMSL

The radar tracks shown are based on a four-day sample from the 2015 summer period. The tracks are colour-coded according to the height above mean sea level (AMSL). Statistics on the numbers of operations relate to fixed-wing aircraft movements for the average 24-hour day, calculated over the 92-day summer period from 16 June to 15 September 2015. The figures have been rounded to the nearest whole number. © Crown Copyright and database right 2015. Ordnance Survey Licence number 100016105.
