Section 8 Assessment (Grading):

- Instructor Competencies as detailed in Part-FCL AMC1 FCL.920 are presented and may be graded on a scale of 1 to 4 when an Instructor AoC has been conducted as part of this assessment.
- Examiner Competencies as detailed in the applicable Standards Documents are presented and must be graded on a scale of 1 to 4 for all EAOc.
- For both Instructor and Examiner Competencies, the following grading criteria apply:
 - 1 = Requiring Improvement
 - 2 = Basic
 - 3 = Good
 - 4 = Very Good

The Grading should reflect the narrative and the identified route cause analysis.

A grade of '1' clearly requires improvement in the applicable competency and would therefore usually result in a failed assessment. However, there may be occasions when this is deemed acceptable. If in doubt, contact FOM.

Section 9 Assessment (Narrative):

The assessment narrative should include details of Briefing, Simulator/Aircraft operation, Instruction, Assessment, Debrief and Regulations and should support the grading. If the AoC is unsuccessful, all reasons for failure must be clearly stated.
